

Campbell County Memorial Hospital

CAMPBELL COUNTY HEALTH

CARDIOPULMONARY

Electrocardiogram (EKG/ECG)

An electrocardiogram— also called an ECG or EKG— records electrical signals as they travel through your heart. Your doctor can use an electrocardiogram to look for patterns among these heartbeats and rhythms to diagnose various heart conditions. An electrocardiogram is a painless, noninvasive way to diagnose many common types of heart problems. Stickers (Electrodes) will be attached to your arms, legs, and chest. If you have hair on the parts of your body where the electrodes will be placed, the technician may need to shave the hair so that the electrodes stick properly.

How long will the procedure take?

The procedure will take approximately five (5)-10 minutes.

How do you schedule your test?

Cardiopulmonary services require an order to perform outpatient procedures. Please contact Cardiopulmonary Services at 307-688-2301 for questions regarding outpatient procedures or the steps to have your physician order your needed procedure; or visit www.cchwyo.org/CPS.

On the day of your scheduled test

Report to Patient Access/Registration on the first floor of Campbell County Memorial Hospital, 501 S. Burma Avenue, 20 to 30 minutes before your scheduled appointment to be checked in and registered. You will then be directed to the Cardiopulmonary Services Department on the Second Floor, North of the hospital.

Campbell County Memorial Hospital's Cardiopulmonary Services (CPS) Department strives to be your first choice for Cardiopulmonary Services by providing superior quality testing, procedures, and outstanding customer service.

For questions, please contact CPS at 307-688-2301.
